North Harbor Dredging - November to December 2015

North harbor dredging is anticipated to commence for the 2015-16 season during the week of November 9, and is anticipated to continue through December 2015. (Note: The north harbor dredging schedule is subject to change depending on federal entrance channel dredging needs and equipment mobilization. North harbor dredging could extend through February 28, 2016, as needed. Any changes or updates to the schedule will be posted online.)

Boaters in the north harbor area should be particularly vigilant about pipeline and equipment hazards in the area. For additional information, please see the north harbor dredging notice.

Pass Seabright on the east side (Crow's Nest side) of the channel unless otherwise marked. Stay at least 50’ from the dredge.

The cross channel pipe is marked with a green buoy at the west end and a red buoy at the east end. Stay between the buoys.

If you have any questions about entrance channel conditions or to report a hazard to navigation, please contact the Harbormaster's office via VHF radio on channel 9, or via telephone at (831) 475-6161. For after-hours emergencies call 911. When approaching the dredge, the crew may be contacted on VHF channel 8 for passing instructions.
